

Immigration

3 types of immigration

Humanitarian

Economic

Environmental

**Immigration
within
Europe**

-Low intra-migration

-Language barriers

-Lack of structure

-Rules being implemented

Our EU proposals

- 1. Temporary visa for humanitarian immigrants, help poor countries, EU couple provide money, army to countries in need of it.
- 2. EU need to be able to control a minimum salary per country to prevent exploitation of immigrants and slave labour.
- 3. We are implementing a quota system depending on the population. All countries must take a quota.

1. Temporary visa for humanitarian immigrants, Help poor countries, EU couple provide money, army to countries in need of it

- Giving people fleeing dangerous cities a second chance
- Expired visa once home country is safe, preventing permanent migration
- We should help countries in bad conditions

2. EU need to be able to control a minimum salary per country to prevent exploitation of immigrants and slave labour

- Aim to keep minimum wage under control
- Preventing immigrants from working for less money than the local people
- Exploitation of immigrants is a serious moral issue

3. We are implementing a quota system depending on the population. All countries must take a quota.

- Quota regarding how many immigrants each country should receive
- Would be depending on number of residents per country
- Also depending on field of work the immigrant would be interested in

Consequences of the temporary visa

Cost of military adds
to debt

Would result in the EU
appearing to be an
open and caring
organization

Some countries such as
Hungary and Poland
may not agree

Negative
environmental impacts
due to the importation
of immigranats and the
depletion of resources

Consequences of the minimum salary

Strong economic benefits such as reducing undeclared work

Moral benefits include all workers working for the same salary and a reduction in discrimination

Some countries may not agree, such as Italy or Austria who currently do not possess a minimum salary

Consequences of the quota system

Expensive to
increase border
control

May improve
relationship between
immigrants and
residents

Again, hard to find
common ground
and may lead to
disagreements

Difficult for
immigrants to find
housing

To conclude

Main issue is finding common ground

Pro's and con's to each proposal and consequence

More benefits than disadvantages

If implemented correctly could lead to a smoother system

Thank you for listening!
