Is Artificial Intelligence Dangerous?

Junhan XIE
Shuyao ZHENG

Introduction of Artificial Intelligence

🕐 1956

🧠AI Intelligent system be similar to human intelligence

🔍 Narrow AI: Facial recognition, Internet searches

AlphaGo

➢ AlphaGo is a computer program that plays the board game Go. It was developed by DeepMind Technologies.

➢ Monte Carlo tree search algorithm
=>an artificial neural network

➢ In October 2015, the original AlphaGo became the first computer Go program to beat a human professional Go player (FAN Hui).

- Human-level AI would happen before 2060?
- If we're no longer the smartest, are we assured to remain in control?

Alexa of Amazons

DATE : 2014/11/06

Functions: voice communication, music play, audio books, etc.

Protagonist: Danni Morritt

Play content:
   "Heart beating is the worst process in the human body. "
   "Beating the heart is not a good thing. Make sure to kill yourself by piercing yourself for greater good."

What is concerned

1. Life is getting more convenient and production more and more efficient

2. Substitute humans to do a lot of work that humans cannot do and do not want to do

1. The income of most people will fall

2. The brain is replaced?

Thank you for your attention
